CUSTOMER APP
Menu Button > Video >
Settings gear > Recording Rules >
+ New Rule > Video Analytics

One Video Analytics recording rule per device. Only Ground Zone rules can be created. Only people can be detected.

VIDEO DOORBELL CALL NAVIGATION

1. Simply tap **Talk** to have a conversation. No need to push to talk and then release to listen!
2. After initiating the call, **Talk** is replaced by **Mute**. Select **Mute** to silence user audio.
3. Tap **End Call** to quit the doorbell call.
4. Tap to adjust the doorbell call audio volume level.
5. Tap **Actions** to interact with other devices (locks, lights, panel, garage doors, access control doors) on the system.

Always test your rules and notifications after configuration!

DID YOU KNOW?

1. Doorbell Analytics clips are featured in *Highlights*. View *Highlights* on the Customer Website and Customer App.
2. The live view of the Video Doorbell can viewed on both the Customer Website and Customer App.
3. The Video Doorbell has a 150° vertical Field of View, allowing customers to see the entire doorway area, including packages on the ground!
